HOW WE DELIVER OUR ILM LEVEL 6

We deliver our ILM level 6 in leadership and management qualifications through a range of mediums to ensure you get the most out of your learning.

We also use our partner Neurocapability's unique brain-based PEEC method (prime, encode, embed and consolidate), which it created using its own neuroscience insights to ensure your learning sticks.

The PEEC method

As experts in how to apply the learning from neuroscience to leadership, we know how best to deliver learning that resonates, sticks and can be put into practice.

Using neuroscience insights, Neurocapability have developed a unique learning delivery system that works with your brain. This is the PEEC method: prime, encode, embed and consolidate.

Prime

Our brain needs the right environment to learn effectively; we can guide you on preparing your brain for learning, from your physical environment to your nutrition.

Embed

The brain loves repetition, so you'll have access to your course materials upon completion, plus you'll have the chance to share your experience with others, which helps you dig deeper into your learning.

Encode

To focus your attention and ensure your learning is meaningful, we'll ask reflective questions throughout, allowing you to relate your learning to your experience.

Consolidate

The final step ensures what you learn becomes hard-wired in your brain, which we do through our membership to The Tribe, our community resource where you can share your continued learning with fellow leaders.

BENEFITS

Combining advanced leadership tools and leadership theory with neuroscience-backed insights, our course equips you to handle senior management responsibilities with confidence and expertise.
